Please amend the subject application as follows:

IN THE CLAIMS

Amend claims 1, 7, 9, 11, 13, and 17 to read:

- Sub E1*
1. (Amended) An information processing apparatus comprising:  
a pointing device;  
a display unit displaying a plurality of icons;  
a detection unit detecting a predetermined operation performed on a first icon which has been dragged to a second icon, said first icon displayed on said display unit and moved with movement of said pointing device; and  
a condition update unit changing a processing condition of the information processing, represented by the second icon, to be performed on said first icon based on the detection of the operation performed on the first icon.

- α2*
7. (Amended) The information processing apparatus according to claim 1, further comprising a processing execution unit executing processing based on the processing condition in information processing changed by said condition update unit.

- α3*
9. (Amended) The information processing apparatus according to claim 8, wherein at least one of said first icon, said second icon and said group of icons is preliminarily associated with said processing condition.

11. (Amended) An information processing apparatus comprising:
- a pointing device;
- a display unit displaying a plurality of icons;
- a detection unit detecting a predetermined operation performed on a first icon which has been dragged to a second icon, said first icon being displayed on said display unit and moved with movement of said pointing device, said second icon including a group of icons associated with said processing condition; and
- a condition update unit updating a processing condition in information processing based on the detection by said detection unit; said condition update unit updating items common to processing conditions all together that is associated with said first icon, said second icon and said group of icons.

13. (Amended) A method of processing information in an information processing apparatus including a pointing device and a display unit displaying a plurality of icons, comprising the steps of:
- detecting a predetermined operation performed on a first icon which has been dragged to a second icon, said first icon moved with movement of said pointing device; and
- changing a processing condition of the information processing to be performed on said first icon based on a result of said detection of the operation performed on the first icon.

17. (Amended) A computer readable recording medium on which a program is recorded for execution of an information processing method in an information processing apparatus including a pointing device and a display unit displaying a plurality of icons, said information processing method comprising the steps of:
- detecting a predetermined operation performed on a first icon which
